

FedRAMP OSCAL Early Adopters

September 27, 2023

info@fedramp.gov
fedramp.gov

Purpose: Ongoing weekly meeting to engage Cloud Service Providers, 3PAOs, tool vendors and other participants in FedRAMP's OSCAL Early Adopters Work Group (OEAW) activities.

Outcomes:

- Shared understanding of Charter and Mission of the Workgroup
- Shared understanding of program participation requirements and initial registration process.
- Shared understanding of repository package requirements and discussion or possible solutions.

Agenda:

- Welcome
- Guiding Principles/Mission Review
- Participation Requirements
- OEAW Updates
- ATO Package Requirements
- Open Forum
- Next Steps & Closing

Keep the discussion respectful

Be curious, seek understanding

Speak from your own experience

Challenge through questions

Focus on ideas

Keep it technical

Charter:

To create an engagement space for Cloud Service Providers, 3PAOs, tool developers and others who are adopting OSCAL for the FedRAMP® use case with the goal of refinement of FedRAMP automation technology and processes.

Mission Elements:

- Bring OSCAL early adopters together to foster community engagement for FedRAMP OSCAL use case.
- Provide bi-directional dialogue with participants on engineering process current and future state.
- Refinement of initial technology and processes for the FedRAMP OSCAL automation ecosystem.
- Testing of initial releases of FedRAMP Automation Portal and RESTful API services.

September 27th, 2023

- **Release 2.3** in testing environment will close multiple github tickets. Will be installed on integration environment this upcoming weekend.
- A word about versions of tools and schemas in REST APIs:
 - NIST Core Validations using OSCAL-CLI 3.4
 - Rev 4/Rev 5 through portal is at OSCAL 1.1.1 will be part of this 2.3 release
 - Schema pathing on NIST OSCAL site will change with 2.3 (should be using).
 - <https://github.com/usnistgov/OSCAL/releases>
 - Automation Team will continue to work on transition from OSCAL 1.0.4 to 1.1.1 this coming week.
 - Release 2.3.0 will include consolidated calls for validations (one for NIST and one for FedRAMP schematron (See Demo). Will also include fixes for OSCAL NIST vs. FedRAMP use case issues with Schematron validations (See github tickets for more detail). Also will include swagger documentation inclusion into REST API calls for OEAW review.

REST API Demo

September 27th, 2023

The working group will have the following options when identifying and submitting issues related to the Portal and RESTful API services:

- Submission of general questions will be done via sending an email to oscal@fedramp.gov.
- Submission of suggestions for process and software improvement can be done via submission form built into the portal or by sending an email to oscal@fedramp.gov.
- Submission of bug reports will be done through the issue to the FedRAMP OSCAL Early Adopters repository (<https://github.com/vitg-gsa-automation/earlyadopters>) or sending an email with screen snapshots to devops@volpegroup.com
 - Once the developers review the bug report they will initiate next steps with submitter.
 - All bug reports will be tagged as FedRAMP automation Portal or REST API issues in the early adopters repository.

September 27th, 2023

Current open Issues on Early Adopters GitHub (Portal 2.2.1)

- (#7) Minified XML behaves differently than “pretty” printed XML (in process)
- (#12) Rule 55b. One or more responsible parties must be defined for each role (in process)
- (#16) import-profile directive with a URL does not resolve. (for discussion)
- (#17) **[Feature Request]: A prop in the back matter for the uuid of the imported document** (need to consider long term implications)

Initial Phases

- Phase 1 Validation Testing
- Phase 2 General Artifact Submission
- Phase 3 Document and Artifact Management
- Phase 4 Process Improvement and New Functionality

Repository Discussion

Basic Repository Requirements

- ❑ Upload/Download of individual OSCAL artifacts and associated documents.
- ❑ Support multiple file formats (see list).
- ❑ Support multiple document types (see list)
- ❑ Support for compressed files (file structure to be determined)
- ❑ Must be able to process and extract base64 encoded documents from OSCAL artifacts
- ❑ Must be able to upload individually and in compressed files associated supporting artifacts.
- ❑ Must allow quick retrieval of and processing of OSCAL data.
- ❑ Must support high speed querying of OSCAL data.
- ❑ Must support versioning of all uploaded artifacts.
- ❑ Must comply with NARA requirements.
- ❑ Must be a HIGH repository.

Basic ATO Package Requirements

- ❑ Support for multiple access to package artifacts.
- ❑ Must support role based access.
- ❑ Support for grouping of documents and artifacts stored in repository.
- ❑ Support for verifying compliance with required artifacts for FedRAMP authorization processes (i.e. package checklist).
- ❑ Optional submission of OSCAL SSP, SAP, SAR and POAM as single artifact?

```
<?xml version="1.0" encoding="UTF-8"?>
<submission-wrapper>
  <system-security-plan>
    ...
  </system-security-plan>
  <assessment-plan>
    ...
  </assessment-plan>
  <assessment-results>
    ...
  </assessment-results>
  <plan-of-action-and-milestones>
    ..
  </plan-of-action-and-milestones>
</submission-wrapper>
```

Current Challenges

- ❑ Verifying package artifact contents.
- ❑ Alignment of artifacts with package submission requirements.
- ❑ Compressed files
 - Which formats to support (gzip, zip, tar, other)
 - Package structure (to be determined)
 - Decompressing and aligning individual files with Document types.
 - File size limitations?

Validation Testing

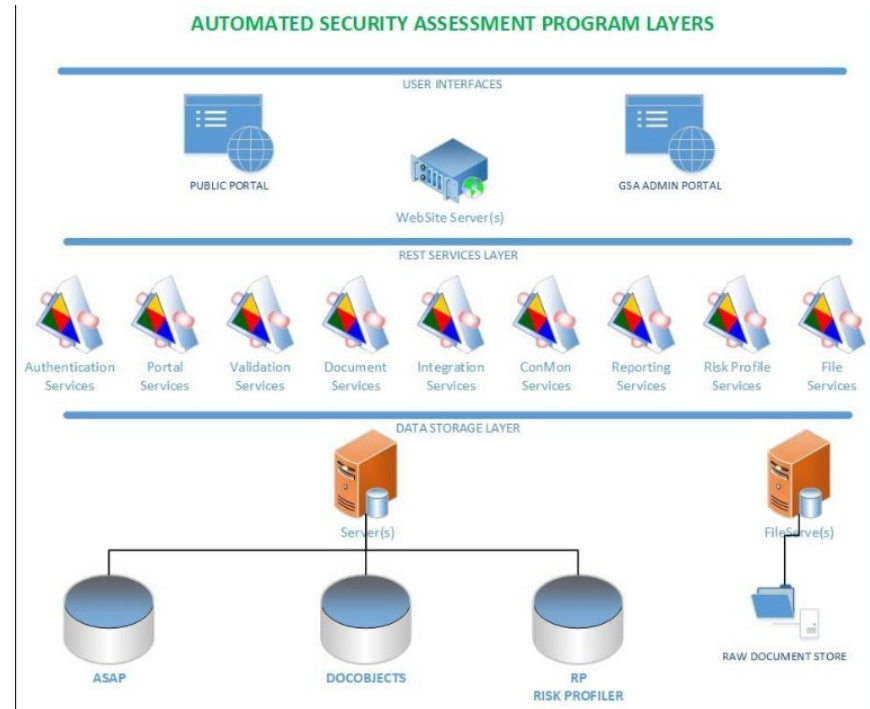

Phase 1

- ❑ Duration: 4-6 weeks (planned).
- ❑ Submission of OSCAL Rev 4 Artifacts (XML Only).
- ❑ Provided via Portal Access only.
- ❑ Refinement of current Schematron ruleset for validations based on feedback from participants.
- ❑ Expansion of Validation of OSCAL Artifacts for other formats (e.g. JSON, YAML).
- ❑ Finalize Rev 4 FedRAMP validation ruleset modifications and migrate to rev 5.
- ❑ Limit of 2GB per XML artifact.
- ❑ Initiate access to RESTful API services for validation testing (optional).

OVERVIEW

REST API Service Ports

- **Authentication Services: port 8080**
- Portal Services: port 8081
- **Validation Services: port 8082**
- Document Services: port 8083
- Integration Services: port 8084
- ConMon Services: port 8085
- Reporting Services: port 8086
- Risk Profile Services: port 8087
- **File Services: port 8088**

Ensuring your outstanding issues or questions are received:

Issues can be submitted in several ways:

Preferred

Open an issue on fedramp-automation github so that it will benefit the NIST/FedRAMP community. <https://github.com/GSA/fedramp-automation/issues>

Alternate

Email us at oscal@fedramp.gov

NIST:

<https://pages.nist.gov/OSCAL/>

Learning Resources: <https://pages.nist.gov/OSCAL/learn/>

Current release: <https://github.com/usnistgov/OSCAL/releases>

Development version: <https://github.com/usnistgov/OSCAL/tree/develop>

Content repo: <https://github.com/usnistgov/oscal-content>

FedRAMP:

Current repo: <https://github.com/GSA/fedramp-automation>

Current issues: <https://github.com/GSA/fedramp-automation/issues>

Validations work: <https://github.com/18F/fedramp-automation/tree/master/src/validations>

Web based validation tool: <https://federalist-2372d2fd-fc94-42fe-bcc7-a8af4f664a51.app.cloud.gov/site/18f/fedramp-automation/#/documents/system-security-plan>

OEAW Phases

General Artifact Submission

Phase 2:

- ❑ Duration: 4-5 weeks (planned)
- ❑ Submission of non-OSCAL legacy package artifacts.
- ❑ Provided via Portal Access only.
- ❑ Refinement of Authorization Package submission process.
- ❑ Initial design of intra-artifact submission processes (e.g. leveraged authorizations)
- ❑ Access to RESTful API services for validation testing (optional)
- ❑ Review and update of RESTful API services documentation.

Document and Artifact Management

Phase 3:

- ❑ Duration: 2-4 weeks (planned)
- ❑ Organization, System and Package structure.
- ❑ Provided via portal access only.
- ❑ Versioning and ATO package relationships
 - ❑ Legacy
 - ❑ Leveraged Authorizations
 - ❑ UUID management
- ❑ Access to RESTful API services for validation testing (optional)

Process Improvement and New Functionality

Phase 4:

- ❑ Duration: TBD (ongoing)
- ❑ Adoption Challenges and Solutions for FedRAMP use case.
- ❑ Challenges with NIST OSCAL Core and potential future updates and model changes.
- ❑ Authorization vs. Automation.
- ❑ Re-visit FedRAMP validations.

July 26, 2023

1. Whitelisting of IPs to gain access to portal and RESTful API services.
 - Send email to oscal@fedramp.gov with IPs to be whitelisted for access.
 - Limit of 2 per organization or an IP address range.
 - MFA is being utilized via SMS only. Provide a valid cell # for each organizational registrant.
 - Provide company/organization logo for portal (optional).
2. Once confirmed, a link to the FedRAMP Portal will be automatically sent to registrant for site access for Phase 1.
 - Register within 5 days of receiving invitation email.
 - Login to Portal to confirm organizational details and verify access.
 - Each participating organization will be provided with its own workspace in the portal. Documents will not be shared between participants unless otherwise agreed to
 - Each participating organization will be provided with a sample Authorization Package for testing validation and uploading of OSCAL artifacts.
3. **THIS IS A BETA TEST SITE – NO SENSITIVE DATA.**
